

+ pool fencing

+ exterior balustrades

+ interior balustrades

## Welcome to Clearly Frameless

We can create a stunning frameless glass solution to suit any style or space.

Frameless glass is our passion and craft. It's why we remain at the cutting edge of design and technology.

It's also why we work closely with you to inspire solutions which are a true reflection of your personality.

All products are made to order and measured and installed by the most experienced tradespeople in the industry.

**FRAMELESS... IT'S WHAT WE DO.**

## + pool fencing

Unobtrusive in its appeal, a frameless glass fence is the ideal solution to enhance your poolside or outdoor environment.

Designed to withstand the elements, a clearly frameless pool fence is made from 12mm toughened Grade A safety glass and is custom made to suit your needs. Choose from clear or feature glass options to create the effect you desire.

## + exterior balustrades

Why spoil the view? That's why we have developed balustrades that allow you to enjoy your view and enhance the exterior of your property while also providing an effective barrier to the outside elements.

Our products meet strict specifications and requirements of building codes, while the hardware used is of such a high quality it makes a design statement in itself.

## + interior balustrades

Practical and functional our interior balustrades allow a 'free flow' design creating an impression of openness. As well as adding value to your home they also act as a secure barrier.

Choose from a wide range of designs and accessories to suit your style and space

## Preformed Concrete Slab

**Glass Type:** 12mm A grade clear toughened glass.

**Hardware Finish:** Stainless steel

**Notes:**

Design required for new situations where the fence is to be installed into a prepared structural paving slab.

## Exposed Channel Installation

**Glass Type:** 12mm A grade clear toughened glass.

**Hardware Finish:** Stainless steel or silver glow pearl powder coat.

**Notes:**

Common design for installations where the fence is required to be installed over existing paving. A sound concrete slab is required under the paving.

## Up Stand Post Installation

**Glass Type:** 12mm A grade clear toughened glass.

**Hardware Finish:** Stainless steel or satin chrome on brass.

**Notes:**

For uses where clearance is required under the glass for drainage or cleaning. May be adapted for both timber and new or existing paving.

## Bolt Fixed Installation

**Glass Type:** 12mm A grade clear toughened glass.

**Hardware Finish:** Stainless steel

**Notes:**

Suitable for fixing to the edge of pool shells, stairwells or balconies where space is limited or top fixing is not possible.

**NOTE:** All situations and structural requirements will vary and are susceptible to some movement. If the main contractor has any concerns over soundness and suitability of the foundation we recommend they seek independent professional engineering advice.

The dimensions and details shown above may vary depending on construction elements and should be used as a guide only.

## 'its what we do'

In fact frameless is all we do. Through unimpeded freedom we create frameless concepts that will, enhance, protect and increase the value of your home or investment.

We are committed to working closely with, and inspiring you to ensure your project is 'cutting edge' and a true reflection of your personality. Your only limitation is your imagination.

We also cater for commercial and multi unit developments.

Through our passionate commitment to, service, quality and customer satisfaction we will be the most enjoyable and hassle free aspect of your renovation or building project.
